

SIFM March 2026 Conference
What's Shaking in the Actuarial Industry?

19 March 2026

Actuarial Transformation

Challenges and Success Factors

Partnerships & Ecosystems

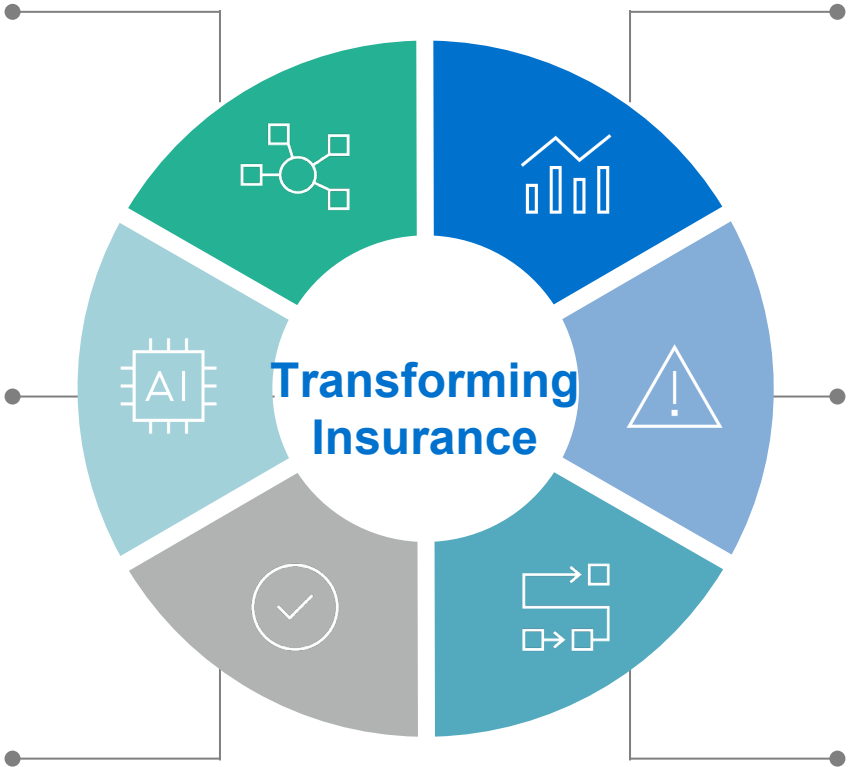

Collaborating with innovative partners and expand service offering

Digital Innovation

Embracing digital technologies like AI, and machine learning

Regulatory Compliance

Staying updated with regulatory changes and compliance requirements

Data Utilization

Leveraging data and advanced analytics for decision making

Risk Management

Implementing advanced risk assessment tools and techniques

Agility & Flexibility

Developing an agile business model to adapt to market changes and trends

Actuarial Transformation

Collaboration and Cultural Change

Only when all stakeholders and relevant departments from sales, pricing, risk, operations, and accounting have the same understanding can transformation be meaningful and lasting.

Leadership support plays a vital role in driving change and allocating resources for digital transformation success.

Open communication fosters transparency, reduces resistance, and encourages collaboration.

Change management and training programs help employees adapt to new technologies and foster innovation culture.

Successful transformation depends on **cross-department collaboration** between IT and business teams aligned on goals and execution.

Collaboration breaks organizational silos, creating a **unified vision** and identifying shared benefits for impact.

Actuarial Transformation
